Google Phat PDF Introduction

Click **Download Lawn Care Template** to download the template

Click **Download Lawn Care Template**

GooglePHAT.com

Click **Ok** to save the file

The screenshot shows a web browser window with the URL http://googlephat.com/member/content/index.php?option=com_content&view=article&id=46:download&catid=3:optir. The browser's address bar and toolbar are visible. The main content area displays the GooglePHAT logo and a navigation menu. A download dialog box is open, titled "Opening LawnCareTemplate.zip". The dialog box contains the following text:

You have chosen to open
LawnCareTemplate.zip
which is a: Compressed (zipped) Folder
from: <http://googlephat.com>

What should Firefox do with this file?

Open with: Windows Explorer (default)

Save File

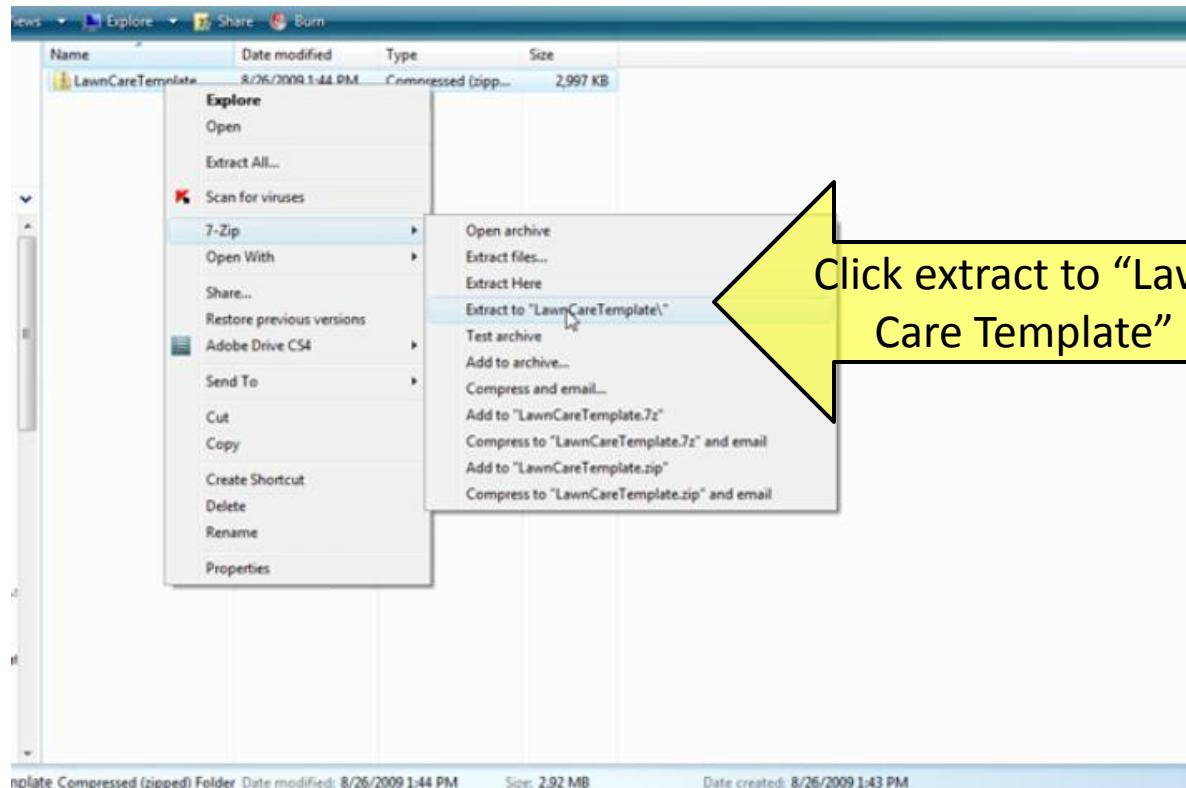

Remember this automatically for files like this from now on.

Buttons: OK, Cancel

A yellow arrow with the text "Click Ok" points to the "OK" button in the dialog box.

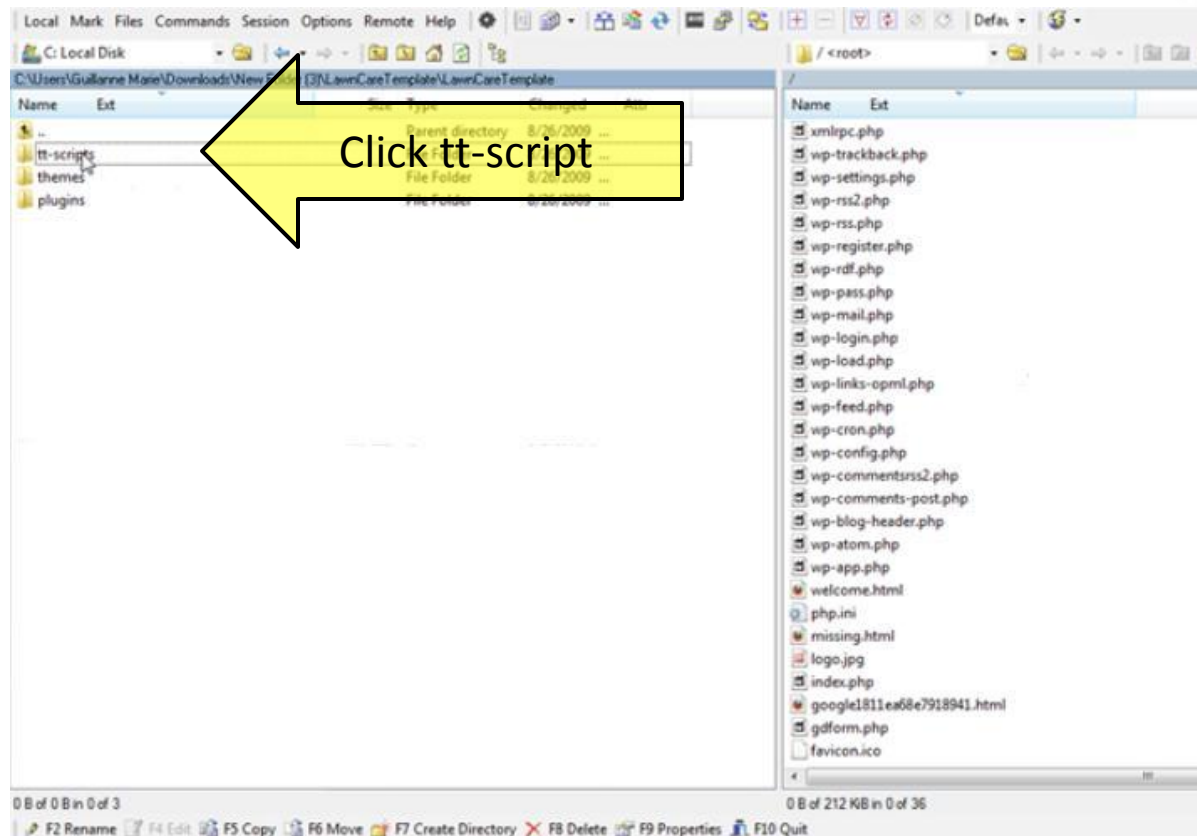

In order to unzip the file **Right your Mouse** click **7-Zip** and click **Extract to “Lawn Care Template”**

First we must download tt-script. Click the **tt-script** folder.

Press **F5** click **Transfer on Background** and click **Copy**

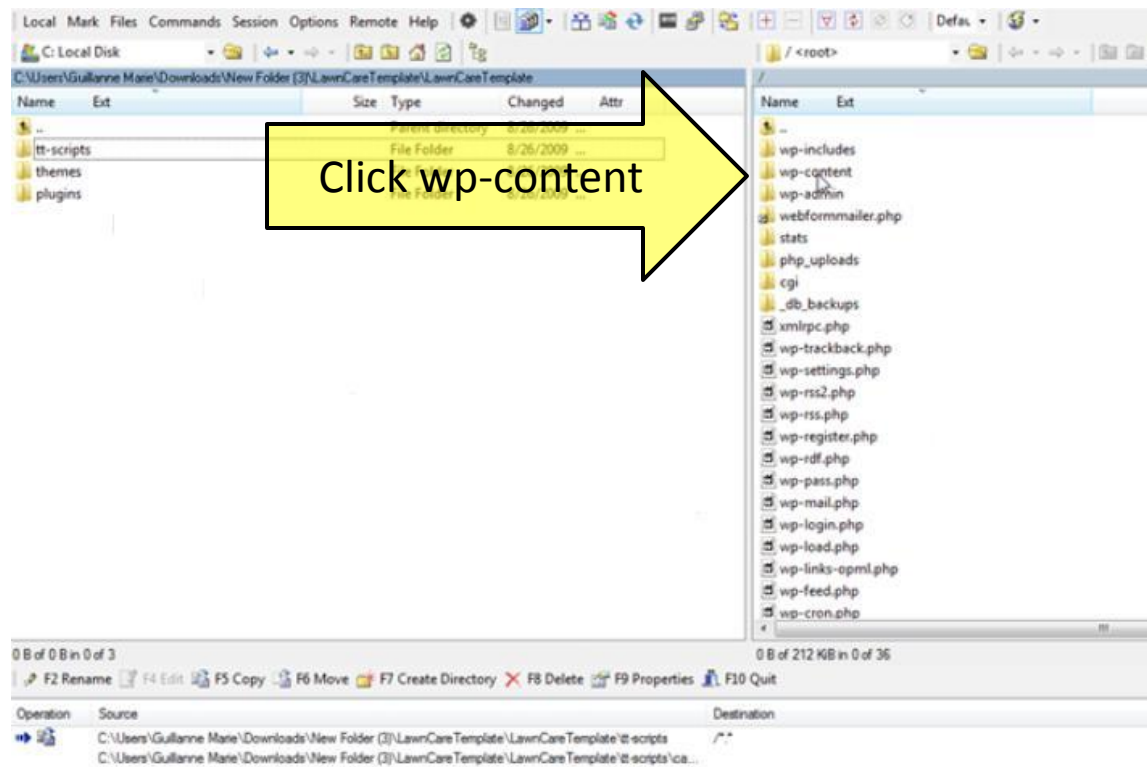

The screenshot shows a file manager interface with two panes. The left pane shows a local directory structure with folders like 'tt-scripts', 'themes', and 'plugins'. The right pane shows a remote directory with various PHP files. A 'Copy' dialog box is overlaid on the right pane, with the following settings:

- Copy file 'tt-scripts' to remote directory: /
- Transfer settings: Default transfer settings
- New and updated file(s) only
- Transfer on background (add to transfer queue)
- Do not show this dialog (always)
- Transfer each file individually

Buttons for 'Transfer settings...', 'Copy', and 'Cancel' are visible. A yellow arrow points to the 'Transfer on background' checkbox with the text 'Click Transfer on Background'. Another yellow arrow points to the 'Copy' button with the text 'Click copy'.

In order to upload the themes you must click **wp-content**

Click on the **themes** folder, click **Transfer on Background** and click **Copy**

The screenshot shows a file manager window with two panes. The left pane shows a directory structure with folders: `..`, `tt-scripts`, `themes`, and `plugins`. A yellow arrow points to the `themes` folder with the text "Click themes". The right pane shows the contents of the `wp-content` directory: `..`, `themes`, `plugins`, and `index.php`. In the foreground, a "Copy" dialog box is open. It contains the text "Copy file 'themes' to remote directory:" and a dropdown menu showing `/wp-content/..*`. Under "Transfer settings", there are several checkboxes: "New and updated file(s) only", "Transfer on background (add to transfer queue)", "Do not show this dialog box again", and "Transfer each file individually". At the bottom of the dialog are buttons for "Transfer settings...", "Copy", and "Cancel". A yellow arrow points to the "Copy" button with the text "Click copy". Another yellow arrow points to the "Transfer on background" checkbox with the text "Click Transfer on Background".

To upload the plugins click plugins folder, press F5 **click Transfer on Background** and **click Copy**

Click plugins

Click Transfer on Background

Click copy
